

BUILD BETTER

PROJECT

Centennial Mortgage Office Bldg.
River Falls, Wisconsin

GENERAL CONTRACTOR

Derrick Commercial
Contracting, LLC.
New Richmond, Wisconsin

END USE

Multi-Tenant Office Building

“Construction time was definitely cut by using the Koreteck system. Windows were placed correctly on the shop drawings, and the overall installation process went smoothly.”

Mark Paschke
Frisbie Architects

OBJECTIVE:

With this 12,657-square-foot building being located near a busy street, the owners wanted a structure with good acoustical qualities to provide a quiet office environment for their firm and to attract other tenants.

SCOPE OF SERVICES:

Panels manufactured by Koreteck™. The design/build project was headed by Derrick Commercial Contracting and Frisbie Architects.

FEATURES:

Frisbie Architects designed the exterior of the building to combine brick and block with EFIS, over the Koreteck panels. Koreteck is a noncavity system that not only provides excellent acoustical performance, but it also can be used with other exterior finishes.

SYSTEMS USED:

Structure: Pre-engineered building system
Walls: 6-inch Koreteck Panelized Building System
Exterior Finish: Acrylic surfacing system and brick

ARCHITECT:

Frisbie Architects, River Falls, Wisconsin
